Proposal for (Self) Reflection and Evaluation of the VET 4.0 Teacher Modules:

- The developed student module is located in the VET 4.0 area: (Internet of Things, Intelligent House 4.0, Smart and Keen Company, Digital Factory for Individualized Mass Products, other)
- My student target group has been (EQF-level, occupation….)
- I did the development process by self-learning/blended learning!
- I tested my self-developed student module with my class.
- How could I profit from the material provided by the website?
- Did the sequencing support the development of my module?
- Did the support of moderators (if provided) support the development of my Module?
- Which amendments do I have for the development process?
- Will I forward the development of Student Modules in my Vocational College?
- Will I be available for the position of a moderator?

For the assessment process: Please provide all relevant material to assess the Student Module and integrate it to the Website VET 4.0
